3/4" BSPT Steam Relief Valve

Part No: 58/0XXX00

Specification

Nominal size

DN20

Tank connection

3/4" BSPT (taper)

Set pressure

From 5 PSI to 225 PSI (0.34 Bar to 15.52 Bar)

Materials

Contact parts: 316 stainless steel

Pressure O ring: Viton GFLT

Alternatives are available, refer to Range

Design Conditions

Weight:	0.6 Kg
Design Pressure (MAWP):	16.5 Bar
Design Temperature Min:	-40°C
Design Temperature Max:	200°C

NOTE: The minimum re-seal temperature is -25°C.
The Design Conditions and Section View dimensions are for the specified part number only.

Range

Description	Part No.
Standard specification	58/0XXX00

NOTE: The pressure setting changes the Part No.

Minnow Relief Valves

Design Options

Function

A relief valve is installed in the vapour space of a tank. It vents to protect the tank from accidental over-pressure or unwanted vacuum conditions. Minnow relief valves are pre-set to give protection against pressure only or against pressure and vacuum.

We offer a range of relief valves for different service conditions and flow requirements. Contact us for more information.

Design Options

The design options below are available on our standard range of Minnow relief valves.

Tank Connection

Threaded: 1" BSP male,
1" BSP female, 1" NPT male

Tank Seal

PTFE

Nominal Bore

25mm (1")

Pressure Setting

Standard valve:
From 1 PSIG to 45 PSIG
(0.07 Bar to 3.10 Bar)

Ventlock valve:
From 1 PSIG to 9 PSIG only
(0.07 Bar to 0.62 Bar only)

Vacuum Setting

From 0.5"Hg to 7"Hg
(0.02 Bar to 0.24 Bar)

Pressure Seal

Viton

Special service conditions:
A range of elastomer seals is
available

Vacuum Seal

Viton

Special service conditions:
A range of elastomer seals is
available

Special Options

Manual vacuum vent button
Ventlock bracket
Body with TIR bracket

Valve Materials

316 stainless steel

Special service conditions:
Wetted parts in high nickel alloys

Minnow Relief Valves

Design Options

Related Parts

We recommend our range of compatible accessories:

- Flame arrester
- Weld-in sockets and nipples

Please contact us for more information about these parts.

Relief Valves for Dedicated Service

We offer a range of relief valves for these service conditions and special cargoes:

- T50 tank containers for liquefied gas
- Rail tank wagons
- U.S. tank trucks
- IBCs and small capacity tanks
- Steam-heating systems for tanks
- Hygienic service
- Food grade for liquid flow

Please contact us for more information about these valves.

1" BSP Minnow Relief Valve - Pressure Only

Part No: 65/0XX00

Specification

Nominal size

DN25

Tank connection

1" BSPM

Set pressure

From 1 PSI to 45 PSI (0.07 Bar to 3.10 Bar)

Materials

Contact parts: 316 stainless steel

Pressure O ring: Viton

Tank seal: PTFE

Alternatives are available, refer to the Design Options page

Design Conditions

Weight: 0.18 Kg

Seal Temperature Range:

Material	Min.Temp.°C	Max.Temp.°C
EPDM	-50	150
Perfluoroelastomer	-15	240
Viton	-20	200

Uniact Relief Valves

Design Options

Function

A relief valve is installed in the vapour space of a tank. It vents to protect the tank from accidental over-pressure or unwanted vacuum conditions. A Uniact relief valve is a single-acting valve. It is pre-set to give protection against pressure only or against vacuum only conditions.

We offer a range of relief valves for different service conditions and flow requirements. Contact us for more information.

Design Options

The design options below are available on our standard range of Uniact relief valves.

Tank Connection

Threaded: , 1½" BSP, 2" BSP

Flanged: 1½" ASA 150

Special service conditions:

Threaded: 1¼" BSP

DIN11851: 50mm, 65mm

Tank Seal

CNAF

Special service conditions:

PTFE

Nominal Bore

40mm (1½")

50mm (2")

Special service conditions:

32mm (1¼")

Pressure Setting

1½": From 0.05 Bar to 4.5 Bar

2": From 0.02 Bar to 4.15 Bar

Vacuum Setting

1½": From 2 kPa to 88 kPa

2": From 2 kPa to 95 kPa

Pressure or Vacuum Seal

Fortyt

Special service conditions:

A range of elastomer seals is available

Valve Materials

316 stainless steel

Special service conditions:

Wetted parts in high nickel alloys

Ancillaries

Cowl

Gauze

Cap

Manual vent button (vacuum valve only)

Uniact Relief Valves

Design Options

Related Parts

We recommend our range of compatible accessories:

- Cowl or cap - with or without gauze
- Weld-in sockets
- Weld-in flanges
- Gaskets
- Fasteners

Please contact us for more information about these parts.

Relief Valves for Dedicated Service

We offer a range of relief valves for these service conditions and special cargoes:

- T50 tank containers for liquefied gas
- Rail tank wagons
- U.S. tank trucks
- IBCs and small capacity tanks
- Steam-heating systems for tanks
- Hygienic service
- Food grade for liquid flow

Please contact us for more information about these valves.

Twinact Relief Valves

Design Options

Function

A relief valve is installed in the vapour space of a tank. It vents to protect the tank from accidental over-pressure or unwanted vacuum conditions. Twinact relief valves are pre-set to give protection against pressure only or against pressure and vacuum.

We offer a range of relief valves for different service conditions and flow requirements. Contact us for more information.

Design Options

The design options below are available on our standard range of Twinact relief valves.

Tank Connection

Threaded: 1½" BSP, 2½" BSP

Special service conditions:

Threaded: 1¼" BSP
DIN11851: 50mm, 80mm

Tank Seal

1½": CNAF

2½": Rubber/PTFE

Special service conditions:
Other materials are available

Nominal Bore

40mm (1½")

65mm (2½")

Special service conditions:
32mm (1¼")

Pressure Setting

From 0.05 Bar to 4.5 Bar

Vacuum Setting

From 1 kPa to 98 kPa

Pressure Seal

Fortyt

Special service conditions:

A range of seal materials is available

Vacuum Seal

Fortyt

Special service conditions:

A range of seal materials is available

Valve Materials

316 stainless steel

Special service conditions:

Wetted parts in high-nickel alloys

Twinact Relief Valves

Design Options

Related Parts

We recommend our range of compatible accessories:

- Flame arrester
- Weld-in sockets
- Flanges - weld-in and adaptor
- Gaskets

Please contact us for more information about these parts.

Relief Valves for Dedicated Service

We offer a range of relief valves for these service conditions and special cargoes:

- T50 tank containers for liquefied gas
- Rail tank wagons
- U.S. tank trucks
- IBCs and small capacity tanks
- Steam-heating systems for tanks
- Hygienic service
- Food grade for liquid flow

Please contact us for more information about these valves.

1½” BSP MK2 Twinact Relief Valve - Pressure Only

Part No: 3A/XXXX00 - Metric Setting

Specification

Nominal size
DN40

Tank connection
1½” BSP

Set pressure
From 0.05 Bar to 4.5 Bar

Materials
Contact parts: 316 stainless steel
Pressure O ring: Fortyt (Fig.1) or Viton (Fig.2)
Vacuum O ring: Fortyt (Fig.1) or Viton (Fig.2)
Tank seal: Rubber/PTFE envelope

Alternatives are available, refer to the Design Options page

Design Conditions

Weight: 0.84 Kg

For more Design Conditions, please contact Fort Vale and refer to the parts drawing.

WARNING: If you install an approved relief valve accessory item, e.g. a flame arrester, cowl, burst disc or baffle, it will decrease the air flow capacity of the relief valve. Thus, you must calculate again to make sure that the decreased air flow capacity will give sufficient protection to your vessel/system. Please refer to Fort Vale for more information.

Flame Arresters & Debris Protection for Relief Valves

Accessories & Spare Parts

Flame Arresters

Specification

A relief valve flame arrester attaches around the ports of the relief valve body. It prevents an external flame from being transmitted into the tank on relief valves with a vacuum setting of ≤ 0.21 Bar (6"Hg).

For relief valves with a vacuum setting of > 0.21 Bar (6"Hg), a flame arrester is frequently used to prevent debris from going into the tank through the relief valve.

Nominal sizes

Compatible with 1", 1½" 2½", 65mm and 80mm relief valves

Material

Stainless steel

WARNING: If you install a flame arrester, it will decrease the air flow capacity of the relief valve. Thus, you must calculate to make sure that the decreased air flow capacity of the relief valve and flame arrester will give sufficient protection to your vessel/system. Refer to Fort Vale for more information.

Flame Arresters

Each flame arrester is compatible for the specified relief valve type only. Flame arresters are not interchangeable between relief valve types.

IMPORTANT: Refer to the air flow decrease data for your valve type. (See **WARNING**)

Compatible Relief Valve	Air Flow Decrease	Part No.
1" Minnow	17% to 20%	179/0300
1½" Twinact	See Note	200/5000
2½" Twinact	See Note	130/5000
2½" & 65mm Super Maxi	1%	176/2900
80mm Hyper Maxi	5.4%	176/2920

NOTE: For the air flow decrease data for Twinact relief valves, please contact Fort Vale.

Debris Protection - Gauzed Cowl

Part No: 176/6000

Specification

A gauzed cowl attaches to the 65mm Super Maxi relief valve cap. It is used to prevent debris from going into the tank through the relief valve.

Nominal sizes

Compatible with a 65mm/2½" Super Maxi relief valve only

Material

Stainless steel

CAUTION: If you install a gauzed cowl onto a Super Maxi relief valve, it can decrease the relief valve air flow capacity. Refer to Fort Vale for more information.

Pressure Gauges

Accessories & Spare Parts

Standard Pressure Gauge

Tell-Tale Pressure Gauge

Specification

We supply standard pressure gauges and tell-tale pressure gauges. Tell-tale pressure gauges have a secondary pointer to indicate if there has been an increase in pressure, even if the pressure subsequently decreases.

All pressure gauges have a 1/4" BSP bottom connection and are glycerine filled.

Pressure range options

0-6 Bar, 0-10 Bar, 0-16 Bar

Material options - internal parts

Brass, stainless steel

Standard Pressure Gauge

Pressure Range Bar	Pressure Range PSI	Internal Parts	Part No.
0-6	0-90	Brass	921/06BBSP
0-6	0-90	St/steel	920/06BBSP
0-10	0-150	Brass	921/10BBSP
0-10	0-150	St/steel	920/10BBSP

Tell-Tale Pressure Gauge

Pressure Range Bar	Pressure Range PSI	Internal Parts	Part No.
0-6	0-90	Brass	921/06TTBBSP
0-6	0-90	St/steel	920/06TTBBSP
0-10	0-150	Brass	921/10TTBBSP
0-10	0-150	St/steel	920/10TTBBSP
0-16	0-230	St/steel	920/16TTBBSP

Weld-In Sockets for Relief Valves

Accessories & Spare Parts

Threaded Weld-In Sockets

Specification

Weld-in sockets are heavy-duty and have an oversized thread so that re-tapping after welding is not necessary

Nominal sizes

From DN15 to DN65

Thread sizes

From 1/2" BSP to 2 1/2" BSP

Material

316 stainless steel

If the type you need is not shown, please contact us

Weld-In Sockets

Nominal Size	Thread	Part No.
DN15	1/2" BSP	600/1030
DN20	3/4" BSP	653/1000
DN25	1" BSP	600/1025
DN40	1 1/2" BSP	600/1010
DN50	2" BSP	600/1017
DN65	2 1/2" BSP	600/1000

DIN11851 Weld-In Sockets

Specification

DIN11851 fittings are compatible with hygienic service conditions. A complete assembly includes a weld-in socket, a slotted nut and a silicone seal

Nominal sizes

DN50, DN65, DN80

Compatible parts

1 1/2", 2" and 2 1/2" relief valves

Material

Socket & nut: 316 stainless steel

Seal: Silicone

If the type you need is not shown, please contact us

DIN11851 Hygienic Fittings

Size	Weld Socket Part No.	Slotted Nut Part No.	Silicone Seal Part No.
DN50	176/2660	176/2670	176/2675S
DN65	176/2645	176/2630	176/2653S
DN80	176/2550	176/2650	176/2685S

Valve Repair and Maintenance Accessories & Spare Parts

We supply a range of special tools and repair kits to do scheduled maintenance and repair procedures to our valves.

We recommend that you use the correct special tools to help you do maintenance and repairs quickly and easily without causing damage to the valve or the new spare parts.

A selection of step-by-step maintenance instruction manuals is also available, please contact us.

CAUTION: Valve maintenance and repair can be dangerous. To do maintenance, you must have experience and qualifications related to valve installation on pressure vessels and systems.

Relief Valve Pressure/Vacuum Test Rig Part No: 400/8000

Specification

You can use the relief valve test rig to test the pressure and vacuum setting of Hyper Maxi, Super Maxi, Twinact, Uniact, Minnow and Steam relief valves.

Valve connection

2½" BSP.

We supply adaptors to change to other BSP and flanged connections.

Test rig supply connection

¼" BSP female socket

Test range

From -0.7 Bar to 6.9 Bar (-10 PSI to 100 PSI)

Operating Instructions: OPIN26. Please contact us.

Footvalve & Relief Valve Seat Repair Kit Part No: 3" Kit - 400/2600 Part No: 4" Kit - 400/2900

Specification

You can use the seat repair kit to re-surface the seating face of a valve if there is damage caused by corrosion.

Compatible

3" Kit: compatible with 2½" Super Maxi relief valve and 3" Cleanflow and Highlift footvalves

4" Kit: compatible with 4" Cleanflow & Highlift footvalves

Connection

Compatible with power tools with a ½" chuck

Kit contents

Selection of grinding and polishing discs

Selection of face-forming tools

Instruction manual

Description	Part No.
2" butterfly valve tool kit	400/2300
3" butterfly valve tool kit	400/2700

APPENDIX

Installation & Operating Instructions

A Client Responsibilities - Valves & Accessories

Client Responsibilities - Valves & Accessories

Installation, Operation & Maintenance Instructions

Compatibility

Make sure that the function and technical specification of the valve/accessory is compatible with the vessel service conditions and the cargo. This includes, but is not limited to:

- dimensions
- pressure/vacuum setting
- air/gas/liquid flow capacity
- maximum allowable working pressure
- test pressure
- minimum/maximum design temperatures
- materials of construction.

Maintenance

Fort Vale valves and accessories have a long life if you use them correctly in compatible service conditions. It is not necessary to lubricate the parts, but we recommend that you obey the precautions that follow:

Visual checks at regular intervals:

1. Examine the valve to make sure there is no damage, wear or corrosion.
2. Examine the valve and adjacent area to make sure there is no leakage of cargo.
3. Examine the fasteners to make sure they are not loose.
4. Make sure the valve operates correctly.

CAUTION: If you operate the valve with very corrosive cargo, or near its temperature and/or pressure limit (very high or very low temperature and/or pressure), do the visual checks more frequently.

As well as the visual checks, schedule suitable maintenance intervals for the valve based on how frequently the valve is used, the type of cargo and the service conditions.

After 2½ years of service, do the checks that follow:

1. Examine the valve to make sure there is no damage, wear or corrosion.
2. Make sure the valve operates correctly.
3. Do a pressure test on the valve.

After 5 years of service, do the checks that follow:

1. Disassemble and clean the valve.
2. Replace all the valve seals.

Replacement Parts

Do not adapt or change the valve. If you install a replacement part, it must be a genuine Fort Vale part.

WARNING: If you install a part that is not a genuine Fort Vale part, there is a risk of:

- injury to personnel
- permanent damage to the valve
- permanent damage to the vessel
- valve malfunction.

External Fire

If the valve is installed in an area where there is a risk of external fire, you must install compatible accessories to prevent damage to the valve.

Compatibility of Accessories

Accessory components must cause no interference with the valve function. Accessories must be made from compatible materials that will cause no damage to the valve materials. Do not install an accessory that will cause an increased load on the valve, i.e. mechanical, static, dynamic, thermal.

Mis-use

Obey the instructions and recommended procedures in the installation and operating instructions. Obey the pressure and temperature markings on the valve and on the drawing. Use the valve/accessory for its correct function only. Fort Vale accept no liability or responsibility for incorrect use of the valve/accessory.
