Flame Arresters \& Debris Protection for Relief Valves
Accessories \& Spare Parts

## Flame Arresters

## Specification

A relief valve flame arrester attaches around the ports of the relief valve body. It prevents an external flame from being transmitted into the tank on relief valves with a vacuum setting of $\leq 0.21 \mathrm{Bar}(6 " \mathrm{Hg})$.
For relief valves with a vacuum setting of $>0.21$ Bar $(6 \mathrm{Hg})$, a flame arrester is frequently used to prevent debris from going into the tank through the relief valve.

## Nominal sizes

Compatible with 1 ", $11 / 2^{\prime \prime} 21 / 2^{\prime \prime}, 65 \mathrm{~mm}$ and 80 mm relief valves

Material
Stainless steel

WARNING: If you install a flame arrester, it will decrease the air flow capacity of the relief valve. Thus, you must calculate to make sure that the decreased air flow capacity of the relief valve and flame arrester will give sufficient protection to your vessel/system. Refer to Fort Vale for more information.

## Flame Arresters

Each flame arrester is compatible for the specified relief valve type only. Flame arresters are not interchangeable between relief valve types.

IMPORTANT: Refer to the air flow decrease data for your valve type. (See WARNING)

| Compatible Relief Valve | Air Flow Decrease | Part No. |
| :---: | :---: | :---: |
| 1" Minnow | 17\% to 20\% | 179/0300 |
| 11/2" Twinact | See Note | 200/5000 |
| 21/2" Twinact | See Note | 130/5000 |
| 21/2" \& 65mm Super Maxi | 1\% | 176/2900 |
| 80mm Hyper Maxi | 5.4\% | 176/2920 |

NOTE: For the air flow decrease data for Twinact relief valves, please contact Fort Vale.

## Debris Protection - Gauzed Cowl

 Part No: 176/6000

## Specification

A gauzed cowl attaches to the 65 mm Super Maxi relief valve cap. It is used to prevent debris from going into the tank through the relief valve.

## Nominal sizes

Compatible with a $65 \mathrm{~mm} / 2^{1} / 2^{\prime \prime}$ Super Maxi relief valve only
Material
Stainless steel
CAUTION: If you install a gauzed cowl onto a Super Maxi relief valve, it can decrease the relief valve air flow capacity. Refer to Fort Vale for more information.
