# Airline Valve

## Design Options

### Function

An airline valve is used when the tank is pressurised during testing or discharge and can be used for inert gas blanketing or vapour recovery. We offer ball valves and butterfly valves for airline connections.

### Design Options

The design options below are available on our standard range of airline valves.

#### Nominal Bore

**DN40 (1½"):** Ball valves

**DN50 (2"):** Ball valves & butterfly valves

#### Tank Connection

**Flanged:** 4 holes  
Different drilling patterns

#### Operation

**Manually operated:** A range of handles is available

**Pneumatically actuated**

#### Inlet

**Threaded:** 1½" BSP, 2" BSP

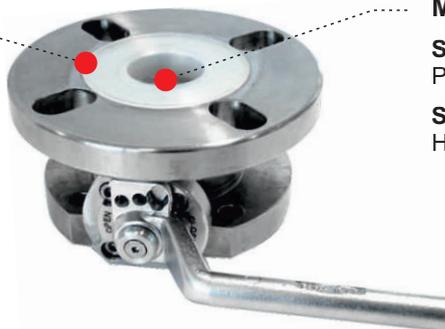

**Dual threaded:** 1½" BSP/1½" NPT

**Flanged:** Closed or open slots

#### Valve Materials

**Standard service conditions:**  
316 stainless steel

**Special service conditions:**  
Lined wetted parts, e.g. PFA

#### Main Seal

**Standard service conditions:**  
PTFE

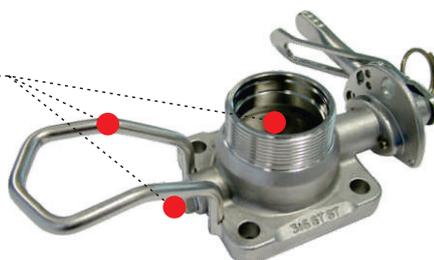

**Special service conditions:**  
High-temperature compatible seals

#### Ancillaries

Gauge guard

Gauze or sintered filter

TIR to gauge inlet plug

## Airline Valve Design Options

---

### Related Parts

We recommend our range of compatible ancillary parts:

- Pressure gauges
- Filters: gauzed or sintered
- Blank caps
- Flanges - weld-in and adaptor
- Fasteners
- Gaskets

Please contact us for more information about these parts.

# DN50 / 2" BSP Airline Butterfly Valve

Part No: 535/0200X

## Specification

### Nominal size

DN50

### Tank connection

Flanged: 4 x 10.9mm holes on a 100mm PCD

### Outlet/Process connection

Threaded: 2" BSP male

### Properties

1/4" BSP gauge connection, gauge guard, handle with TIR

### Materials

Contact parts: 316 stainless steel

Main seal: PTFE

Alternatives are available, refer to the Design Options page

## Design Conditions

Weight:	3.7 Kg
Design Pressure (MAWP):	6.9 Bar
Test Pressure:	12.5 Bar
Design Temperature Min:	-40°C
Design Temperature Max:	190°C

**NOTE:** The Design Conditions and Section View dimensions are for the specified part number only.

# DN50 Flanged Airline Butterfly Valve

Part No: 535/3000

## Specification

### Nominal size

DN50

### Tank connection

Flanged: 4 x 18mm holes on a 125mm PCD (DIN50 PN10)

### Outlet/Process connection

Flanged: 4 x open slots, min. PCD: 2" BSTD

### Properties

1/4" BSP gauge connection, gauge guard, handle with TIR

### Materials

Contact parts: 316 stainless steel

Main seal: PTFE

Alternatives are available, refer to the Design Options page

## Design Conditions

Weight:	5.9 Kg
Design Pressure (MAWP):	6.9 Bar
Test Pressure:	12.6 Bar

## Pressure Gauges Accessories & Spare Parts

### Standard Pressure Gauge

### Tell-Tale Pressure Gauge

### Specification

We supply standard pressure gauges and tell-tale pressure gauges. Tell-tale pressure gauges have a secondary pointer to indicate if there has been an increase in pressure, even if the pressure subsequently decreases.

All pressure gauges have a 1/4" BSP bottom connection and are glycerine filled.

#### Pressure range options

0-6 Bar, 0-10 Bar, 0-16 Bar, 0-40 Bar

#### Material options - internal parts

Brass, stainless steel

### Standard Pressure Gauge

Pressure Range Bar	Pressure Range PSI	Internal Parts	Part No.

# Airline Ball Valves & Airline Butterfly Valves

## Installation Options

### DN32 Airline Ball Valves

### DN50 Airline Butterfly Valves

THIS PAGE IS INTENTIONALLY BLANK

# Discharge Butterfly Valve

## Design Options

### Discharge Butterfly Valve (Secondary Closure Valve) Function

A discharge butterfly valve is used to load and discharge cargo. It is usually a secondary closure valve that is installed onto a footvalve (primary closure valve) at the drain point of a tank. A butterfly valve can also be used as a primary closure valve on the top of a tank.

**NOTE:** Refer to a separate page for discharge butterfly valves dedicated to Road Tankers.

### Design Options

The design options below are available on our standard range of butterfly valves.

#### Body Style

**Clamped:**

Scrolled face - install between two flanges

#### Body Style

**Flanged:**

4 or 6 hole drilling patterns  
Dual-drilled hole patterns  
Open slots

#### Body Style

**TW:**

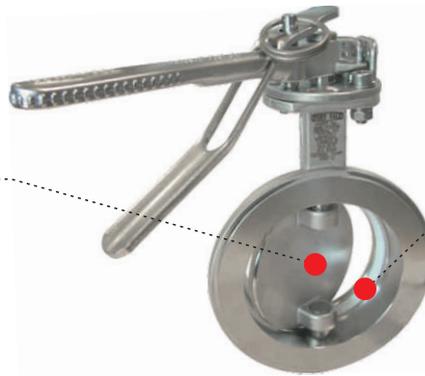

Compatible with Tankwagen drilling pattern

#### Nominal Bore

**Standard service conditions:**

50mm (2"), 80mm (3"),  
100mm (4")

#### Main Seal

**Standard service conditions:**  
PTFE

**Special service conditions:**  
High-temperature compatible seals

#### Operation

**Manually operated:**

Lockable handles are available  
Left hand & right hand operation

**Pneumatically actuated**

### Design Options - continued

#### Valve Materials

**Standard service applications:**  
316 stainless steel

**Special service applications:**  
Lined wetted parts, e.g. PFA  
Wetted parts in high nickel alloys,  
e.g. 904L stainless steel, Alloy C276

#### Special Cargoes

**Solidifying cargo:**  
Body with steam-heating connections  
Hemispherical poppet

### Discharge Butterfly Valves for Dedicated Service

We offer a range of discharge butterfly valves suitable for these service conditions and special cargoes:

- Road Tankers
- Hygienic service

Please contact us for more information about these valves.

### Related Parts

We recommend our range of compatible ancillary parts:

- Flanges - inlet, adapter, outlet, blind
- Tertiary closures
- Fasteners
- Gaskets

Please contact us for more information about these parts.

# Discharge Butterfly Valves - Road Tanker Specification

## Design Options

### Function

A discharge butterfly valve is used to load and discharge cargo. It is usually a secondary closure valve that is installed after a footvalve (primary closure valve) at the drain point of a tank. Our road tanker discharge butterfly valves are designed to weld to the discharge pipework so that there is no need to centralise the valve.

We offer two types of road tanker discharge butterfly valves:

- DN80 (3") Tankpro - 3 piece valve
- DN80 (3") Unifly - 2 piece valve

**NOTE:** Refer to a separate page for discharge butterfly valves dedicated to tank containers and transportable tanks.

### Design Options

The design options below are available on our standard range of Tankpro and Unifly discharge butterfly valves.

#### DN80 (3") Tankpro

##### Operation

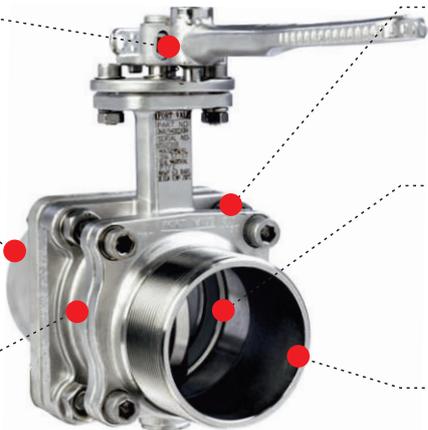

Manually operated  
Pneumatically actuated

##### Inlet

None  
Straight  
Angled

##### Valve Materials

316 stainless steel  
**Special service conditions:**  
High nickel alloys

##### Body

Non-vented  
Vented: 3/8" BSP  
Vented: 3/8" NPT

##### Main Seal

PTFE  
**Special service conditions:**  
High-temperature compatible seals

##### Outlet

3" BSP  
3" BSP extended  
3" NPT  
Weld prepared

#### DN80 (3") Unifly

##### Operation

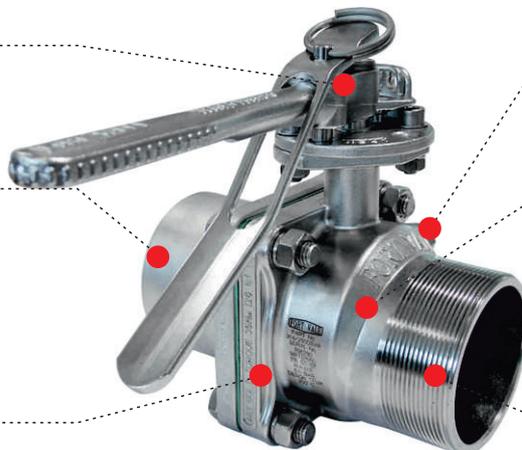

Manually operated  
Pneumatically actuated

##### Inlet

None  
Straight  
Angled  
85mm I/D

##### Valve Materials

316 stainless steel  
**Special service conditions:**  
High nickel alloys

##### Body

Non-vented  
Vented: 3/8" BSP

##### Main Seal

PTFE  
**Special service conditions:**  
High-temperature compatible seals

##### Outlet

3" BSP  
3" BSP extended

## Discharge Butterfly Valves - Road Tanker Specification

### Design Options

---

### Discharge Butterfly Valves for Dedicated Service

We offer a range of discharge butterfly valves suitable for these service conditions and special cargoes:

- Tank containers & transportable tanks
- Hygienic service

Please contact us for more information about these valves.

### Related Parts

We recommend our range of compatible ancillary parts:

- Flanges - inlet, adapter, outlet
- Tertiary closures
- Fasteners

Please contact us for more information about these parts.

# DN80 Tankpro Road Tanker Butterfly Valve

Part No: 368/9400SXBA

## Specification

### Nominal size

DN80

### Body type

Weld-prepared inlet, 3" BSP threaded outlet

### Properties

Left hand operated, lockable handle with TIR

### Materials

Contact parts: 316 stainless steel

Main seal: PTFE

Alternatives are available, refer to the Design Options page

## Design Conditions

Weight:	6.15 Kg
Design Pressure (MAWP):	6 Bar
Test Pressure:	11 Bar
Design Temperature Min:	-40°C
Design Temperature Max:	200°C

**NOTE:** The Design Conditions and Section View dimensions are for the specified part number only.

### Approvals

BS EN 14432

LRQA Design Appraisal: DCF9376/1

Rijksdienst voor het Wegverkeer Approval: VLG S-9301

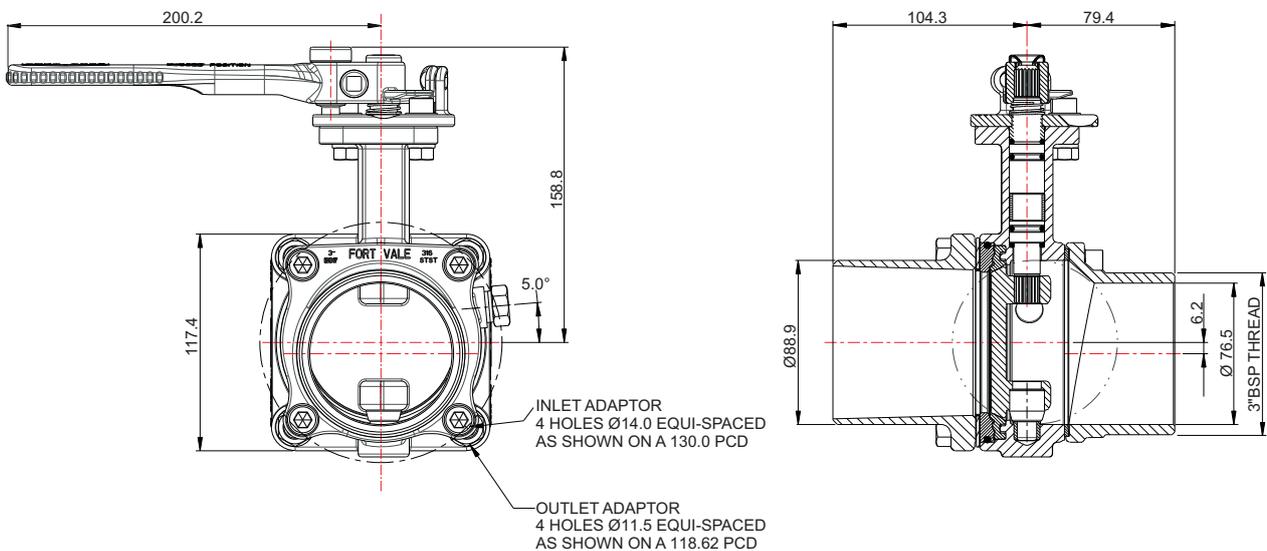

## Range

Body	Outlet	Part No.
Non-vented	3" BSP standard	368/9400SXBA
Vented 3/8" BSP	3" BSP standard	368/9400SVBA
Non-vented	3" BSP extended	368/9400SXEA
Vented 3/8" BSP	3" BSP extended	368/9400SVEA

### Parts List

Item	Description	Part No.
1	M6 socket head set screw	5111-030
2	Washer	20370
3	Handle	368/0075
4	Electrical continuity spring	368/0014
5	M8 socket head cap screw (2)	5111-148
6	M8 plain washer (2)	5113-005
7	Stuffing plate	368/0041
8	Stuffing clamp bush	368/0301 <input type="checkbox"/>
9	PTFE O ring	20363 <input type="checkbox"/>
10	Viton O ring	20361 <input type="checkbox"/>
11	Spindle	368/0200
12	Split bearing	252/0517
13	Perfluoroelastomer O ring	5005-586 <input type="checkbox"/>
14	PTFE spindle seat	368/0009 <input type="checkbox"/>
15	M12 full nut (4)	5112-006
16	M12 spring washer (4)	5113-010
17	M12 hex head set screw (4)	5111-023
18	Inlet adaptor *Note	368/9410
19	CNAF/PTFE inlet gasket	5005-707 <input type="checkbox"/>
20	Nitrile O ring	5005-342 <input type="checkbox"/>

### Parts List

Item	Description	Part No.
21	Seal clamp	368/9148
22	PTFE main seal	368/0002 <input type="checkbox"/>
23	Closure plate	368/0400
24	Bottom spindle bush	368/0035 <input type="checkbox"/>
25	3/8" taper plug *Note	5128-0XX
26	Bottom spindle	368/0036
27	Body (non-vented) *Note	368/9420A
28	M10 socket head cap screw (4)	5111-053
29	M10 spring washer (4)	5113-002
30	3" BSP outlet *Note	368/9430
31	PTFE outlet seal	5005-706 <input type="checkbox"/>
32	M8 full nut (2)	5112-001
33	M8 spring washer (2)	5113-003
34	Key	368/4625

# DN80 Unify Road Tanker Butterfly Valve

Part No: 368/2500SVA

## Specification

### Nominal size

DN80

### Body type

Weld-prepared inlet, 3" BSP threaded outlet

### Properties

Left hand operated, handle with TIR

### Materials

Contact parts: 316 stainless steel

Main seal: PTFE

Alternatives are available, refer to the Design Options page

## Design Conditions

Weight:	5.76 Kg
Design Pressure (MAWP):	6 Bar
Test Pressure:	11 Bar
Design Temperature Min:	-40°C
Design Temperature Max:	200°C

**NOTE:** The Design Conditions and Section View dimensions are for the specified part number only.

# Bolt Torque Guide & Step Loading Procedure

## Installation & Operating Instructions

### Flange Bolting

**CAUTION:** Weld-distortion and too much tightening force will cause damage to a flange.

It is important not to cause damage to weld-in flanges and mating flanges. If a flange is damaged it will not give a satisfactory seal when a gasket and secondary mating flange is installed.

Bolt-stress can decrease after initial tightening. The cause can be deformation of the gasket material, particularly with soft materials such as a CNAF/PTFE envelope gasket.

Best procedure recommends that, after initial bolting, the flange joint is tightened again after a period of time. Most gasket manufacturers advise a period of 24 hours. ASME PCC-1-2000 GUIDELINES FOR PRESSURE BOUNDARY BOLTED FLANGE JOINT ASSEMBLY advises a minimum period of 4 hours.

Bolt torque calculations are based on a flat flange to within 0.15mm.

Recommended bolt torque values will be reduced if a lubrication is used.

### Bolt Torque

#### Bolt Torque Values

Fort Vale bolt torque values are given as a reference guide only and are based on:

- the use of a CNAF/PTFE gasket.
- unlubricated fasteners.
- a flange flat to within 0.15mm.

**CAUTION:** If you use a different gasket material, a lubricant or a flange with distortion, you must re-calculate the torque value.

#### Bolt Torque Procedure

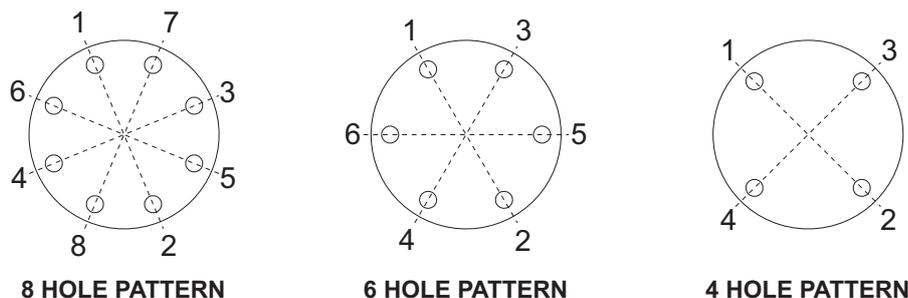

To install flanged parts correctly:

- Examine the mating flange of the part.
- If the flange is marked with a torque value, obey that torque value.
- If there is no torque value marked on the mating flange, obey the bolt torque values given in Table BT1.
- Tighten the bolts evenly in sequence. Refer to Figure BT1.
- Obey the Step Loading Procedure (ASME PCC-1-2000). Refer to the next page.

**Table BT1**

Thread	Torque Value
M10	30 Nm (22 lbf.ft)
M12	65 Nm (48 lbf.ft)
M16	81 Nm (60 lbf.ft)

**Figure BT1**

## **Bolt Torque Guide & Step Loading Procedure**

### **Installation & Operating Instructions**

---

## **Step Loading Procedure**

To install flanged parts correctly, obey the Step Loading Procedure extract from ASME PCC-1-2000:

### **Install**

Hand tighten, then “snug up” to 15 Nm (10 lbf.ft) to 30 Nm (20 lbf.ft) (not to exceed 20% of Target Torque). Check flange gap around circumference for uniformity. If the gap around the circumference is not reasonably uniform, make the appropriate adjustments by selective tightening before proceeding.

### **Round 1**

Tighten to 20% to 30% of Target Torque. Check flange gap around circumference for uniformity. If the gap around the circumference is not reasonably uniform, make the appropriate adjustments by selective tightening before proceeding.

### **Round 2**

Tighten to 50% to 70% of Target Torque. Check flange gap around circumference for uniformity. If the gap around the circumference is not reasonably uniform, make the appropriate adjustments by selective tightening before proceeding.

### **Round 3**

Tighten to 100% of Target Torque. Check flange gap around circumference for uniformity. If the gap around the circumference is not reasonably uniform, make the appropriate adjustments by selective tightening before proceeding.

### **Round 4**

Continue tightening the bolts, but on a rotational clockwise pattern until no further nut rotation occurs at the Round 3 Target Torque value. For indicator bolting, tighten bolts until the indicator rod retraction readings for all bolts are within the specified range.

### **Round 5**

Time permitting, wait a minimum of 4 hr and repeat Round 4; this will restore the short-term creep relaxation/embedment losses. If the flange is subjected to a subsequent test pressure higher than its rating, it may be desirable to repeat this round after the test is completed.

## Client Responsibilities - Valves & Accessories

### Installation, Operation & Maintenance Instructions

## Compatibility

Make sure that the function and technical specification of the valve/accessory is compatible with the vessel service conditions and the cargo. This includes, but is not limited to:

- dimensions.
- pressure/vacuum setting.
- air/vapour/liquid flow capacity.
- maximum allowable working pressure.
- test pressure.
- minimum/maximum design temperatures.
- materials of construction.

## Maintenance and Inspection

Fort Vale valves and accessories have a long life if you use them correctly in compatible service conditions. It is not necessary to lubricate the parts, but we recommend that you do the inspections that follow:

### Inspections at regular intervals:

1. Examine the valve to make sure there is no damage, wear or corrosion.
2. Examine the valve and adjacent area to make sure there is no leakage of cargo.
3. Examine the fasteners to make sure they are not loose.
4. Make sure the valve operates correctly.

**CAUTION:** If you operate the valve with very corrosive cargo, or near its temperature and/or pressure limit (very high or very low temperature and/or pressure), do the inspections more frequently.

Also, schedule regular maintenance based on how frequently the valve is used, the type of cargo and the service conditions.

### Inspections after 2½ years of service or a minor incident:

1. Examine the valve to make sure there is no damage, wear or corrosion.
2. Make sure the valve operates correctly.
3. Do a pressure test on the valve.

### Inspections after 5 years of service or a major incident:

1. Disassemble and clean the valve.
2. Replace all the valve seals and do a pressure test.

## Replacement Parts

Do not adapt or change the valve. If you install a replacement part, it must be a genuine Fort Vale part.

**WARNING:** If you install a part that is not genuine, there is a risk of:

- injury to personnel.
- permanent damage to the valve.
- permanent damage to the vessel.
- valve malfunction.

## External Fire

If you install the valve in an area where there is a risk of external fire, you must install compatible accessories to prevent damage to the valve.

## Compatibility of Accessories

Accessory components must cause no interference with the valve's function. Accessories must be made from compatible materials that will cause no damage to the valve materials. Do not install an accessory that will cause an increased load on the valve, such as mechanical, static, dynamic or thermal load.

## Mis-use

Obey the instructions and recommended procedures in the installation and operating instructions. Obey the pressure and temperature markings on the valve and on the drawing. Use the valve/accessory for its correct function only. Fort Vale accept no liability or responsibility for incorrect use of the valve/accessory.
